Authorization for this examiner's amendment was given in a telephone interview with Mr. Joel H. Bock on 04/12/2005.

The application has been amended as follows:

In claim 3,

line 1: delete "2" and substitute --1--.

In claim 44,

line 1: delete "of the type",

line 7: delete "and",

after line 7, indent and insert as a new paragraph --a handle assembly pivotally mounted to the housing, a push rod mounted for movement with the handle assembly and relative to the handle assembly, the push rod being positioned to be engageable with the valve handle, an interior space formed between the valve handle and said handle assembly. a drive motor mounted in said interior space and connected to the handle assembly and connected to the push rod to cause movement thereof, a power supply for operating the drive motor, and a sensor associated with the actuator and connected to the power supply to cause the application of power to the drive motor, the

handle assembly being engaged with the valve handle for causing pivotal movement of the handle independent of the push rod; and--,
